

Internet Search Engines

We all know what the Internet is and how to use it, well at least we think so! Most of you have probably got access to the Internet at home or visit the I.T. club at lunch times in school and have used it then. But do you know how to use the Internet properly?

Search Engines

Question:

First of all, ask yourself what is a search engine? Have you ever used one? Can you name one?

Answer:

Simply put, an Internet search engine helps you to locate and find information on the World Wide Web, which we don't know how to find or simply can't find.

Popular search engines you may know of include:

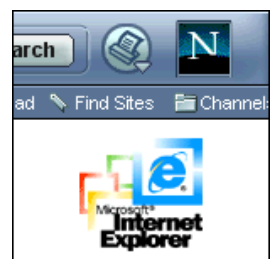

Google[™] www.google.com

www.yahoo.com

www.ask.com (ask Jeeves)

Task Brief

Following the **demonstration** by your teacher showing you how to use Internet search engines, it is now your chance to show your teacher how well you can use the Internet.

- You will need to use the **Internet** to find and locate the answers to the questions below (use the Internet search engine of your choice).
- **When** you have found the answers, type them into a **word document** which is titled '**Internet Search Task**'
- You are then to **e-mail your answers** as an **attachment** to your **teacher** who will then mark your work and reply to your e-mail.
